
price and tariff reform

the secretariat's perspective

dirk buschle

permanent high level group

17 october 2012

the problem with non-costreflective prices and tariffs

- ... disincentivize investments
- ... prevent market opening
- ... affect security of supply
- ... promote energy **inefficiency**
- ... are applied in a non-targeted way

why is action needed now?

a bit of history

- athens memoranda: „*comprehensive tariff reform*“
- european commission: „*reforming the existing system of regulated prices*“
- permanent high level group „*concern about persisting barriers to the establishment of open national and regional markets, including excessive price regulation*“

why is action needed now?

- joint and systematic action rather than leaving contracting parties alone
- secretariat being flooded by complaints
- the risks of non-action becoming more apparent
- coupling price reform with social protection

price regulation: still possible?

- regulated network tariffs: a requirement by the *acquis*
 - what is cost-reflectivity?
 - what is cost-efficiency?
- regulated end-user prices: yes but ...
 - article 3 and case law
 - state aid
 - phase-out required

the secretariat's approach

- analytical paper on compliance (electricity only)
- presented to the phlg
- public consultation
- presentation at the fora
- proposed as mc recommendation (on the website)

the recommendations in detail

- real eligibility (mid 2013)
 - including all customer groups
 - removing all obstacles for supplier switching

- make network tariffs cost-reflective (mid 2013)
 - main elements to be taken into account
 - ecrb to develop comparative analysis and recommendations

the recommendations in detail

- cost-reflectivity of universal service (mid 2013)
 - households and sme
 - covering full costs of generation/imports/supply incl bad debts
 - no more regulation of generation price

- vulnerable customers (mid 2013)
 - define vulnerable customers by law
 - move protection schemes from (across-the-board) tariff to social welfare

the recommendations in detail

- deregulate large customers (2014)
 - no switching back
 - exceptions in line with article 3
- annual reviews for necessity of price regulation
- reform of market designs (2014)
 - abandon full supply public contracts
 - implement capacity release programmes
 - re-design suppliers of last resort

thank you for your attention!

A large, semi-transparent image of a landscape with mountains and water serves as the background for the slide.
