

EU4Energy

COUNTRY WORK PROGRAMME | MOLDOVA

Area 1 Energy Efficiency

- Activity 1.1 Gap analysis of the implementation of Law no 128/2014 on Energy Performance of Buildings and update of the existing drafts of secondary legislation
- Activity 1.2 Revision of energy efficiency primary legislation to bring it in compliance with Directive 2012/27 on Energy Efficiency

Area 2 Electricity Market

- Activity 2.1 Support in drafting Regulation on conditions of access to the network for cross-border exchanges in electricity
- Activity 2.2 Support in drafting Electricity Market design (concept design) including also a transitional phase
- Activity 2.3 Support in drafting Wholesale Electricity market rules including the forward market, the day-ahead and intra-day market, the balancing market and auxiliary services procurement and imbalances settlement

Area 3 Gas Market

- Activity 3.1 Support in developing the Methodology for calculation of tariffs and regulated prices:
 - Activity 3.1.1 Methodology for calculation, approval and application of tariffs for natural gas transmission service (including tariffs for entry-exit)
- Activity 3.2 Support in developing the Transmission Network Code
- Activity 3.3 Support in developing the Distribution Network Code

EU4Energy

Area 5 Energy-Related Environment

- Activity 5.1 Support in developing the Regulation on the limitation of emission of certain pollutants into the air from large combustion plants

Area 7 Improvement of the institutional framework

- Activity 7.1 Support in organization of High level policy talks on gas and electricity markets, energy efficiency and independence of the energy regulator

Area 8 Greater technical, institutional and administrative capacity

- Activity 8.2 Support in establishing and operation of the Working group to follow up on the reforms in the electricity sector
- Activity 8.3 Support in establishing and operation of the Working group to follow up on the reforms in the gas sector
- Activity 8.5 Support in establishing and operation of the Working group to follow up on the reforms in the area of energy related environment

The EU4Energy Initiative covers all EU support to improve energy supply, security and connectivity, as well as to promote energy efficiency and the use of renewables in the Eastern Partner countries Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine. It does this by financing projects and programmes that help to reform energy markets and to reduce national energy dependence and consumption. Over the longer term, this makes energy supply more reliable, transparent and affordable, thus reducing energy poverty and energy bills for both citizens and the private sector.
