Natural Gas Trading Hub | Traded Volumes

Gas

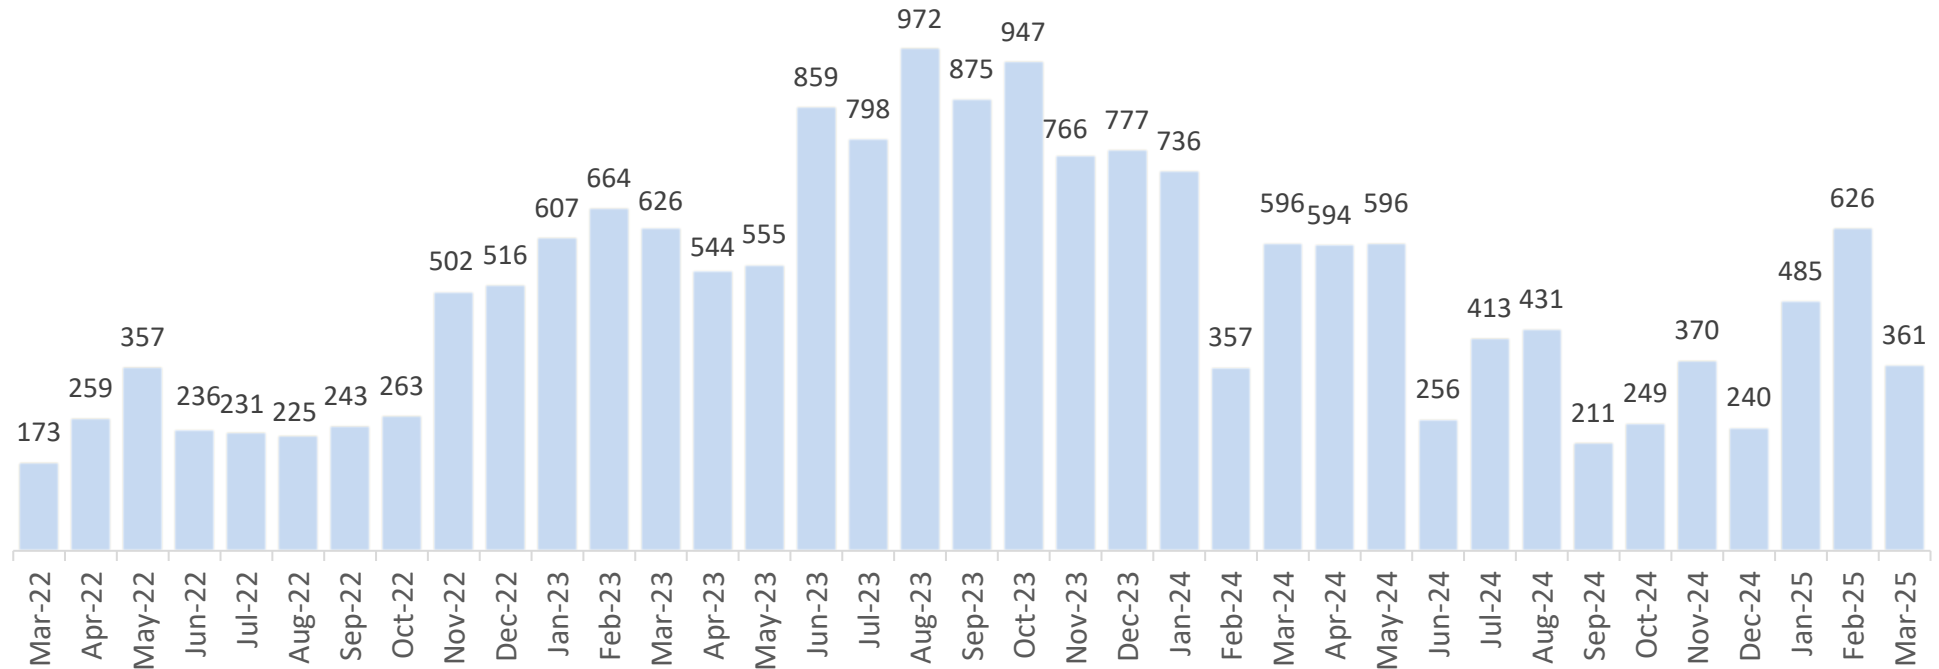

Spot

- ✓ Within-Day
- ✓ Daily Contracts (D+1, D+2, D+3)

Forward

BoM and FM under investigation

One-Sided Traded Volumes in GWh

- > **5 TWh** of gas was traded on the exchange in 2024, down from **9 TWh** in 2023 but up from **3 TWh** in 2022
- > **18.4 TWh** was traded (one-sided) from late March 2022 to March 2025

Natural Gas Trading Platform | Next Steps

- ✓ **Introduction of the Trading-only Participant this month**
 - Firms that are not Transmission Users in Greece can register with us, provided they submit a joint statement with a Transmission User of the Greek grid, with the latter assuming any physical delivery obligations resulting from the Trading-Only Participant's trading activity
 - Easier access to NGTP
- ✓ **New Gas Products cleared by EnExClear**
 - Ongoing assessment of the introduction of new products on NGTP, including weekend, balance-of-month, and front-month contracts
- ✓ **Access through Trayport**
 - Ongoing assessment of connectivity with Trayport systems (GV Portal or ETS)
 - Visibility booster for Greek prices, potentially driving higher liquidity
 - One-screen solution for traders, streamlining and optimizing trading activities
- ✓ **Offsetting Gas**
 - Δεσφα to be able to purchase offsetting gas on NGTP

THANK YOU!
