5. Regulatory developments in the Contracting Parties

[Ref. presentations by ERE, SERC, GNERC, ERO, ANRE, REGAGEN, AERS, NEURC]

The regulatory authorities of all Contracting Parties updated on energy sector and regulatory developments in their jurisdictions. The presentations of six NRAs are available on the Energy Community web page, restricted meeting folder. The following updates were provided without the slides:

ERC: after the adoption of the new Energy Law, ERC is preparing 39 secondary legislation acts and is supposed to approve 77 documents of other energy sector stakeholders. There is an ongoing process of employing seven new experts to facilitate fulfillment of various new tasks. Recertification of MEPSO started due to the change in the ownership. Investments in RES continue, with around 170MW of new capacity this year (120 MW in PV and 44MW in wind).

Conclusions / Action Points: no conclusion required, agenda item for information.

6. Recent Energy Community developments

[Ref. presentation by ECRB Unit]

The representatives of the Energy Community Secretariat informed participants on the Energy Community developments since the last ECRB meeting. The relevant presentation is available on the Energy Community web page- restricted meeting materials.

Conclusions / Action Points: no conclusion required, agenda item for information.

7. Development of regional TCMs in the Energy Community

Mr. Juris summarized the status quo regarding the development of MCO IP and CCR reconfiguration and provided information on the submission by five CP TSOs of the information on the lack of agreement regarding the regional allocation platform (RAP), in line with Article 4 of the FCA Regulation, to the ECRB. Mr. Juris pointed out that not all NRAs had been informed about this submission and suggested that communication with all the TSOs should be launched. In this respect, a draft letter has been prepared and will be sent to the ECRB members for approval. Mr. Radeshi stressed that the ECRB had been informed in one of the previous meetings that TSOs could not reach the agreement on RAP. Mr. Taran stated that Moldovan TSO Moldelectrica asked for a delay in this process due to the legislative changes and the specifics of the interconnections with Ukraine. He also pointed out that usage of JAO was being discussed in Moldova. Mr. Zametica said that SERC had not been informed about the TSOs' actions and that he would support the circulation of the previously mentioned letter. He also pointed out that the ECRB should have all the information on the intentions and possibilities to join JAO. Mr. Stefanovic said that Serbian TSO already turned to JAO, also participating in its ownership structure, and that it would not join SEE CAO. He also stressed that the interpretation of regional vs. single allocation platform should be provided. Mr. Bucaj supported the circulation of the letter and stressed that the TSOs should be given another opportunity to agree on regional level. Mr. Slobodian agreed with the statements of Mr. Taran and Mr. Stefanovic and highlighted that, given the delay in the adoption of the EIP in Ukraine, a postponement of the whole RAP related process should be

considered. Mr. Skopelja raised the question whether ECRB could legally decide on the application of JAO. Mr. Preinstorfer stated that the discussion and decision on RAP should be considered taking into account the fact that CPs would eventually join the EU and would need to join JAO anyway. Mr. Hujber stated that the ECRB should invite the EnCS to develop an options paper, after all documents are submitted by the TSOs, tackling the governance and cost related issues of RAP decision.

Conclusions / Action Points: The ECRB President invited the ECRB Unit to circulate the draft letter asking TSOs to submit all relevant documents to the ECRB for the approval in ten days. He also asked the ECRB Unit to develop the options paper as suggested by Mr. Hujber.
