RAA PHASE II – STAKEHOLDER ENGAGEMENT

Cross-Border Sustainable Renewable Acceleration Areas in Ukraine – PHASE II

Introduction of Renewables Acceleration Areas in Ukraine: institutional, regulatory and awareness issues on the pathway to EU RED III implementation

Stakeholder Discussion Session

Venue: Online on Zoom (pre-registration [link](#))

Date: 6 November 2026

Time: 10:00 – 12:00 EEST (09:00 – 11:00 CET)

CONCEPT

As Ukraine advances its green energy transition and post-war reconstruction while progressing along its EU integration path, aligning national energy governance with the EU's revised Renewable Energy Directive (RED III) has become of a high priority. Central to RED III is the establishment of Renewables Acceleration Areas (RAAs)—designated zones intended to fast-track project permitting, optimize spatial planning, and streamline grid integration while embedding strict, front-loaded environmental safeguards.

However, transposing and operationalizing the RAA framework within Ukraine presents a complex matrix of institutional, regulatory, and public awareness challenges. From an institutional perspective, national agencies, regional administrations, and local hromadas face overlapping mandates, fragmented spatial data, and capacity constraints. Regulatively, Ukraine must harmonize its land-use planning, environmental impact assessment (EIA/SEA) frameworks, and grid connection rules with EU directives without compromising environmental integrity or national energy security. At the awareness level, local authorities, private developers, and civil society lack a shared understanding of what RAA designation entails, often misinterpreting accelerated permitting as a deregulation mechanism that bypasses community rights or environmental protections.

In this regard the event is aimed to discuss existing achievements and identify further steps in supporting the RED III requirements implementation in Ukraine.
