

Planning for a just and sustainable energy transition: the role of JT guidance

Venue: online

Date: Friday 27/6/2025

Time: 10:00 - 12:00 CET

The Just Transition principles are firmly rooted in the Energy Community. The growing commitment to develop dedicated Just Transition Plans or Roadmaps, as evidenced by ongoing efforts within several Contracting Parties' National Energy and Climate Plans (NECPs), reflects a shared objective to ensure that the energy transformation is not only sustainable, but also socially just.

For this reason, this event will explore the structure and potential of using Just Transition Plans or Roadmaps as practical guiding tools for the energy transition. A well-structured, clear document on just transition can serve as a compass for energy transition actions, as well as constitute a financing roadmap for domestic and international financing.

10:00 - 10:10 / Opening and welcoming remarks	Adam Cwetsch, Energy Community Secretariat (EnCS)
10:10 - 10:20 / Policy Guidelines on just transition as a part of integrated energy and climate planning	Marta Schulte-Fischedick, Energy Community Secretariat (EnCS)
10:20 - 10:30 / Fireside chat: Just Transition in the Energy Community - is there a transition and is it just?	Nevena Smilevska, Bankwatch
10.30 - 11.20/ Panel: How to plan for a just transition?	Götz von Stumpfeldt/ Advisor at GIZ Innovation Regions for a Just Energy Transition (IKI JET) Nevena Smilevska, Bankwatch Monika Figaj, Energy Community Secretariat (EnCS) Katharina Hartmann, DG ENER
11.20 -11.50 / "When I was writing my JT plan...": challenges and opportunities of drafting JT Plans	Elena Nikolovska from Eko-svest Biljana Ramic, Ministry of Energy and Mining Serbia

AGENDA

	Vadym Tabakera, Lviv regional military administration, Ukraine
11.50 – 12.00 / Closing remarks	Adam Cwetsch, Energy Community Secretariat (EnCS)
