GAS ACTION PLAN
CROATIA

TABLE OF CONTENTS

1 Roadmap structure ......................................................................................................................... 1
2 Action Plan ........................................................................................................................................ 4
3 Checklist/ Guidelines for each action ............................................................................................... 15

1 ROADMAP STRUCTURE

The proposed structure, as described below is also presented for easier reference in the diagram (see page 3).

Chapter 1 - Acquis communautaire

This chapter aims to ensure that the provisions of the Directive 2003/55/EC are transposed. The information required in this chapter is a reference to the national legislation indicating both the legal disposition and the relevant articles, in case that the Directive’s provisions were adopted accordingly.

The overall deadline for the transposition of the gas acquis is the 1st July 2007, except for the eligibility calendar which is January 2008 for non-household consumers and January 2015 for household consumers

Chapter 2 – Market Structure

The chapter addresses market concentration and to propose, if deemed necessary, measures. It also pursues effective unbundling of system operators

Chapter 3 – Wholesale market

This chapter addresses the wholesale market design and rules in order to achieve competitive market. Competition in the wholesale market shall be ensured by transparency provisions and the regarding market monitoring. The necessary balancing regime is being covered as well as the required licensing and authorization process.

Chapter 4 – Retail market

This chapter aims to ensure that the retail market opening measures in terms of eligibility thresholds and time schedules are being implemented.

The customer switching process and the payment reform is being addressed, as well as customer protection.
**Chapter 5 – Tariff reform and Affordability**

This chapter covers the issue of cost reflectivity in all inclusive tariffs, network usage tariffs (transmission and distribution networks) as well as the exemption criteria for new infrastructure. Tariffs for storage facilities and affordability issues are also being covered.

**Chapter 6 – Market integration**

This chapter includes a description of issues related in particular to cross border trade and cross border transport. The key issues to be solved at regional level include the methodology for capacity allocation, the tariffs for transit and for storage/LNG facilities which also serve for abroad and the licensing provisions that are mutually recognised. This chapter’s actions should be regarded as of regional level and should be agreed upon by regional bodies.
## ACTION PLAN

### Chapter 1 - Adoption of the acquis communautaire – ACTIONS

### CHECKLIST/GUIDELINES for Each Action

CHECKLIST/GUIDELINES to Chapter 1 – Acquis communautaire

<table>
<thead>
<tr>
<th>No.</th>
<th>Subchapter</th>
<th>Checklist/Guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>General rules/ Imposition on undertakings</td>
<td>• If applicable, description of the possible impositions on gas undertakings of Public Service Obligations: Description of the provision and reference to national legislation</td>
</tr>
</tbody>
</table>
| 1.2 | General rules/ Customer protection | • Final customer protection and to ensure high levels of consumer protection:  
• Protection of vulnerable customers (including measures to avoid disconnection)  
• Protection customers in remote areas  
• Dispute settlement mechanism  
• Economical and social cohesion  
• Supplier of last resort |
| 1.3 | General rules/ Public Service Obligations (PSO) | • Report immediately after the implementation of the Public Service Obligations provisions  
• Reporting every two years on any changes regarding the Public Service Obligations |
| 1.4 | General rules/ authorisation | • Authorisation criteria for building and/or operation of gas facilities or supply of natural gas  
• Motivation of refusals to applicants and appeal procedures  
• Refusal if existing or proposed capacity is not saturated |
| 1.5 | General rules/ Monitoring Security of Supply | • Provisions monitoring of Security of Supply: supply/demand balance; expected future demand and available supplies, capacity being planned or under construction level of maintenance of the existing infrastructure, etc  
• Identification responsible Institution for the monitoring  
• Report every year outlining the findings |
| 1.6 | General rules/ Technical rules | • Technical rules regarding connection to the LNG facilities, storage facilities, other transmission and distribution systems and direct lines to ensure interoperability of systems.  
• Objective and non-discriminatory rules  
• Publication and notification of the technical rules |
| 1.7 | Transmission, storage and LNG/ Designation of system operators | • Designation of one or more system operators either by the country or by natural gas undertakings which own transmission, storage or LNG facilities |
| 1.8 | Transmission, storage and LNG/ Tasks of system operators | • Define the tasks of the system operators (s) in line with art. 8:  
  - Operate, maintain, develop under economic conditions transmission, storage and/or LNG facilities  
  - Provide sufficiently information to any other system operator  
  - Objective balancing rules  
  - Procure energy needed for carrying out their functions on a transparent market based procedure |
| 1.9 | Transmission, storage and LNG/ Unbundling of TSO | • Independent at least in terms of legal form, and organisation and decision-making from other activities not relating to transmission.  
• Implementation of minimum independent criteria according to Art. 9.2 including establishment of a compliance programme |
<p>| 1.10 | Transmission, storage and | • Each transmission, storage and/or LNG system operator shall preserve confidentiality of commercial sensitive information |</p>
<table>

</tr>
<tr>
<td>1.16</td>
<td>Unbundling and transparency of accounts/Right of access to accounts • Designate competent authorities, including regulatory authorities, to have right of access to the accounts of gas undertakings • Preserve the confidentiality of commercial sensitive information</td>
</tr>
<tr>
<td>1.17</td>
<td>Unbundling and transparency of accounts/Unbundling of accounts • Gas undertakings to draw up, submit to audit and publish their annual accounts according to rules defined in accounting acquis • Internal accounting: Separate accounts for each of their transmission and distribution LNG and storage activities; separate accounts for supply activities for eligible and non-eligible customers</td>
</tr>
<tr>
<td>1.18</td>
<td>Organisation of access to the system/Third party access • Ensure third party access to the transmission-, distribution and LNG facilities based on published tariffs, applicable to all eligible customers • TSO shall have for purpose of carrying out their functions access to other network of other TSO • Compliance of long term contracts with competition rules</td>
</tr>
<tr>
<td>1.19</td>
<td>Organisation of access to the system/Access to storage • Regulated or negotiated access (or both) to storage facilities • Provisions shall not apply to temporary storage that are related to LNG facilities and necessary for re-gasification process • If negotiated access natural gas undertakings and eligible customers shall be able to negotiate access to storage facilities, based on published tariffs and main conditions • If regulated access natural gas undertakings and eligible customers shall have a right to access to storage based on published tariffs and terms</td>
</tr>
<tr>
<td>1.20</td>
<td>Organisation of access to the system/Access to upstream pipeline networks • Gas undertakings and eligible customers shall be able to obtain access to upstream networks taking the provisions of paragraph 2 into account • Refusal in accordance with determined criteria • Establishment of a dispute settlement arrangements, including cross border disputes</td>
</tr>
<tr>
<td>1.21</td>
<td>Organisation of access to the system/Refusal of access • Access to the system can be refused in accordance with the criteria of paragraph 1 like lack of capacity etc. • Enhancements of capacity by gas undertakings if it is economic to do so and the potential customer is willing to pay for</td>
</tr>
<tr>
<td>1.22</td>
<td>Organisation of access to the system/New infrastructure • Exemption from the provisions of art. 18, 19, 20 and 25(2), (3) and (4) for new infrastructure or significant increases of capacity in existing infrastructure • Exemption mechanism and criteria in accordance with art. 22 (1)</td>
</tr>
<tr>
<td>Section</td>
<td>Description</td>
</tr>
<tr>
<td>---------</td>
<td>-------------</td>
</tr>
<tr>
<td>1.23</td>
<td>Organisation of access to the system/Market opening and reciprocity - Decision on case by case basis by regulatory authority; formal decision of another relevant body is possible. Eligible customers are all non-household customers from 1 January 2008 and all customers from 1 January 2015. To avoid imbalance in the opening of the gas markets reciprocity shall be taken into account.</td>
</tr>
<tr>
<td>1.24</td>
<td>Organisation of access to the system/Direct lines - Supply of eligible customers shall be enabled in accordance with the relevant criteria to be determined by a competent authority.</td>
</tr>
<tr>
<td>1.25</td>
<td>Organisation of access to the system/Regulatory authorities - Designation of competent body(ies) with the function of regulatory authorities which is independent of the interests of gas industry. Regulatory authority ensure effective competition and the efficient functioning of the market, responsible for fixing or approving at least methodologies used to calculate or establish terms and conditions for tariffs and the provision of balancing services etc. Act as dispute settlement authority, taking cross border disputes into account.</td>
</tr>
<tr>
<td>1.26</td>
<td>Final provisions/ Safeguard measures - In the event of a sudden crisis the responsible authority may take necessary safeguard measures, causing the least possible disturbance to the functioning of the market.</td>
</tr>
<tr>
<td>1.27</td>
<td>Final provisions/ Derogations in relation to take or pay commitments - Derogation from Art. 18 in relation to take or pay commitments. Applications presented on a case by case basis; derogation has to be duly substantiated in accordance with criteria of Art. 27 (3).</td>
</tr>
<tr>
<td>1.28</td>
<td>Final provisions/ Emergent and isolated markets - Isolated markets may derogate from Articles 4, 9, 23 and/or 24. Emergent market may derogate from Articles 4, 7, 8(1) and (2), 9, 11, 12(5), 13, 17, 18,23(1) and/or 24. For development of infrastructure in geographically limited area derogation from Articles 4, 7, 8(1) and (2), 9, 11, 12(5), 13, 17, 18, 23(1) and/or 24 could be applied for.</td>
</tr>
<tr>
<td>1.29</td>
<td>Final provisions/ Review procedure - Review procedure.</td>
</tr>
<tr>
<td>1.30</td>
<td>Final provisions/ Committee - Committee process in accordance with Article 30 of the Directive.</td>
</tr>
<tr>
<td>1.31</td>
<td>Final provisions/ Reporting - Reporting requirements in accordance with Article 31 of the Directive.</td>
</tr>
<tr>
<td>1.32</td>
<td>Final provisions/ Implementation: Entry into force - Implementation and Entry into force requirements.</td>
</tr>
<tr>
<td>No</td>
<td>Subchapter</td>
</tr>
<tr>
<td>----</td>
<td>------------</td>
</tr>
</tbody>
</table>
| 2.1| Domestic production/Storage/LNG operator(s)/importer trader, retailer | Define markets, measure and assess market concentration in each Party’s gas industry like:  
- Domestic production volume and capacity, import volume and capacity  
- Wholesale activities  
- Retail activities  
- Storage capacities (injection and withdrawal capacities and storage volume)  
- Etc., by applying analytical techniques that are consistent with international best practice and with the precedent established by the competition authority of the EC and, as relevant, of MS that have implemented European competition law |
| 2.2| Importer, trader, retailer | Analyse trade, including cross border trade conditions regarding hurdles like import or export restrictions and precautions in order to remove those restrictions |
| 2.3| Domestic production/Storage/LNG-operator(s)/importer, trader, retailer | Based on the results obtained in action 2.1 and 2.2 propose measures, if deemed necessary, like:  
- Implementation of a gas release program  
- Decision whether a negotiated or regulated storage access shall be implemented  
- Restructuring of gas industry  
- Planning of new capacities  
- Security of supply provisions  
- Etc. |
| 2.4| Transmission-system operators (TSO) | Develop and implement:  
- Effective unbundling  
- TPA conditions  
- Effective operations including planning (new capacities, development of infrastructure forecast etc.) |
| 2.6| Distribution system operators (DSO) | Develop and implement:  
- Effective unbundling, if obliged to do so  
- TPA conditions  
- Effective operations including planning (new capacities, development of infrastructure forecast etc.)  
- Restructuring of distribution activities, if necessary |

|        | 3.2 Market rules| • Ensure compatibility between national markets regarding:  
|        |                |   - Wholesale market opening (compatibility of agreements concerning eligibility)  
|        |                |   - Import and export restrictions  
|        |                |   - Interconnection agreements  
|        |                |   - Operational balancing agreements  
|        |                |   - Balancing regimes  
|        |                |   - Provisions concerning "old" and new long term take or pay contracts  
|        |                |   - Ancillary services, by elaborating and implementing the regarding actions/measures |
| 3.3    | Transparency    | • Data to be made available (published) to market participants concerning:  
|        |                |   - Activities  
|        |                |   - Services offered (including tariffs etc.)  
|        |                |   - Conditions of access  
|        |                |   - Nomination procedure,  
|        |                |   - Capacity allocation  
|        |                |   - Available capacity  
|        |                |   - Anti capacity hoarding mechanism  
|        |                |   - Maintenance information  
|        |                |   - Disruption circumstances/conditions  
|        |                |   - Etc. |
| 3.4    | Market monitoring | • Develop and implement a market monitoring system and monitor activities like:  
|        |                |   - Market opening level  
|        |                |   - Market concentration for domestic production, if any, import, wholesale activities, storage activities  
|        |                |   - Abuse of dominant position  
|        |                |   - Security of supply  
|        |                |   - Switching rate  
|        |                |   - Gas price development for eligible and non eligible customers  
<p>|        |                |   - Etc. |
| 3.5    | Balancing       | • Establishment of a non-discriminatory, broadly cost neutral balancing regime which avoids cross subsidisation between system users |
| 3.6    | Licensing and Authorization | • Provide compatibility and harmonization concerning licence/ authorization conditions based on objective, non-discriminatory criteria, including provision for the reasons for any refusal and implement them |</p>

<tbody>
<tr>
<td>4.1</td>
<td>Eligibility thresholds</td>
<td>• Elaborate and implement actions/measures in terms of eligibility thresholds and time schedule, necessary to open the market</td>
</tr>
</tbody>
</table>
| 4.2 | Payment reform                     | • Elaborate and implement actions/measures for the payment reform like:  
  - Improvement of collection rates,  
  - Installation of proper metering devices,  
  - Electronically data processing  
  - Etc.                                                                                                                                                                                                                                                                             |
| 4.3 | Customer switching                 | • Develop and implement measures for transparent customer switching like:  
  - Termination of existing contracts,  
  - Application for network access for existing and/or new point of consumption  
  - Metering and settlement arrangements including when switching in between reading a cycle  
  - Time schedule for supplier switching  
  - Load profiles for customers which are not hourly metered  
  - Upgrade of IT systems and electronic filing required for customer switching  
  - Etc.                                                                                                                                                                                                                                                                             |
| 4.4 | Transport capacity usage           | • Elaborate and implement a methodology for transport capacity allocation for:  
  - New consumers like first come first serve, pro rata, auctioning  
  - Customers switching the supplier like capacity goes with the customer  
  - Etc.                                                                                                                                                                                                                                                                             |
| 4.5 | Customer protection                | • Develop and implement measures for protection of the customers like:  
  - Cost reflectivity for grid usage  
  - Transparent price settings for non-eligible customers including price information on the bills  
  - Avoidance of subsidies among customer groups  
  - Transparent customer information  
  - Quality of supply standards incl. monitoring  
  - Vulnerable customers  
  - Dispute settlement mechanism  
  - Disconnection criteria  
  - Transparency of bills  
  - Financing the support mechanism, if any  
  - Etc.                                                                                                                                                                                                                                                                             |
## CHECKLIST/GUIDELINES to Chapter 5 – Tariff reform and affordability

### FIELDS NOT TO BE AMENDED BY THE CONTRACTING PARTIES

<table>
<thead>
<tr>
<th>No</th>
<th>Subchapter</th>
<th>Checklist/Guidelines</th>
</tr>
</thead>
</table>
| 5.1 | All inclusive regulated tariffs | - Develop and implement measures regarding:  
- Analysis of cost reflective tariffs  
- Calculation and implementation of non discriminatory cost reflective tariffs based on efficiently incurred cost taking into account an appropriate rate of return provide incentives for capacity expansion; the respective time schedule and plan for bring regulated tariffs to cost reflectivity shall be included  
- Avoidance of cross subsidies between different categories of consumers |
| 5.2 | TPA tariffs for transmission/distribution networks | - Elaborate an in terms of eligibility thresholds and time schedule and implement measures regarding:  
- Transparent, non-discriminatory, cost reflective, non-discriminatory published tariffs, reflecting efficiently incurred cost whilst fostering competition and providing incentives for capacity expansion  
- Appropriate return on investment  
- Avoidance of cross subsidies between users  
- Taking into account backhaul flows |
| 5.3 | Transit network use | - Develop and implement measures regarding elaboration/implementation:  
- Transparent, non-discriminatory, cost reflective, non-discriminatory published tariffs, reflecting efficiently incurred cost whilst fostering competition and providing incentives for capacity expansion  
- Appropriate return on investment  
- Avoidance of cross subsidies between users  
- Taking into account backhaul flows |
| 5.4 | Tariff for new infrastructure (exemption granted) | - Elaborate and implement criteria/institutions for the exceptions to general rules of TPA including cross border infrastructure |
| 5.5 | Tariff for new infrastructure (without exemption in accordance to art. 22) | - Develop and implement actions/measures regarding transparent non-discriminatory published tariffs for new infrastructure, avoiding cross subsidies between network user and are based on efficiently incurred cost; backhaul flows should be taken into account |
| 5.6 | Tariff storage (regulated/negotiated) | - Develop and implement actions/measures regarding transparent non-discriminatory published tariffs; avoiding cross subsidies |
| 5.7 | Affordability | - Develop and implement actions/measures regarding support scheme for the benefit of vulnerable customers, incl. incentives for economic energy use |
### Checklist/Guidelines to Chapter 6 – Market Integration

<table>
<thead>
<tr>
<th>No</th>
<th>Subchapter</th>
<th>Checklist/Guidelines</th>
</tr>
</thead>
</table>
| 6.1 | Interconnection/transmission capacities/Transit capacity                   | • Develop and implement measures regarding transparent non-discriminatory:  
- Capacity allocation mechanism  
- Offering firm/interruptible capacity  
- Congestion management procedures  
- Avoidance of capacity hoarding (use it or lose it stipulations)  
- Capacity trading/secondary market  
- Calculation of available capacity  
- Interoperability issues  
- Co-operation of infrastructure maintenance |
| 6.2 | Cross border transport                                                     | • Elaborate and implement actions/measures regarding:  
- Published interconnection agreements  
- Published operational balancing agreements  
- Avoidance of any customs duties  
- Quantitative restrictions or measures having equivalent effect  
- Generally Applicable Standards of the European Community |
| 6.3 | Storage/LNG facilities also used abroad, if any (regulated or negotiated access) | • Elaborate and implement actions/measures regarding:  
- Transparent, published non-discriminatory tariffs and/or terms for storage/LNG usage which facilitate cross border gas trade, including appropriate return on investment whilst facilitating capacity expansion and fostering competition  
- In case that storage access is regulated, the tariffs shall be based on efficiently incurred cost |
| 6.4 | Licensing                                                                  | • Analyze the compatibility of licensing and develop and implement licensing provisions which foster cross border trade/transport |
