UKRAINE:

RENEWABLE ENERGY

Status and prospects of using sustainable liquid biofuels in transport

Yurii Shafarenko

State Agency on Energy Efficiency and Energy Saving of Ukraine

National Renewable Energy Action Plan till 2020

11% of energy, produced from RES

In total energy consumption

Energy Strategy of Ukraine till 2035

25% of energy, produced from RES

In the structure of primary energy supply

State Agency on Energy Efficiency and Energy Saving of Ukraine 2

Factors for the development of liquid biological fuels production sphere:

Availability of regulatory documents on the definition of specifications that bioethanol, biodiesel, automobile gasoline and high quality diesel should meet.

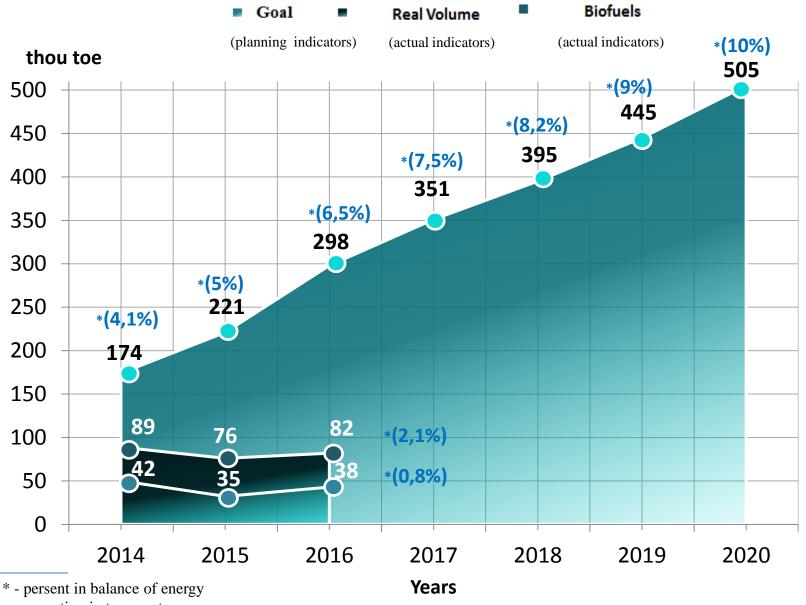

1 million tons of oil equivalent

Significant capacity for the production of liquid biofuels of enterprises operating in the alcohol industry (operating rate -14 %)

Energy consumption from RES in the transport sector until 2020

consumption in transport

DRAFT LAW OF UKRAINE ON DEVELOPMENT OF THE PRODUCTION OF LIQUID BIOLOGICAL FUELS SPHERE AND STABILITY OF BIOFUELS

(№7348 dated 29/11/2017)

Creation of legislative basis for development of production sphere and use of liquid biofuel in transport

Draft Law provides :

Obligatory quotas on the biocomponent share in the volume of sold motor fuel:

For Gasoline

From January 1, 2020 - not less than 4,8 % (energy)

From January 1, 2019 - not less than 3,4 % (energy)

For Diesel From January 1, 2019 - not less than 2,7 % (energy)

Responsibility for non-compliance with quotas

From January 1, 2020 biocomponents must meet sustainability criteria

State Agency on Energy Efficiency and Energy Saving of Ukraine

EXPECTED RESULTS FROM THE ADOPTION OF THE DRAFT LAW:

>

Fulfillment of Ukraine's international obligations on the share of renewable energy in gross final consumption of energy in transport, in particular, Directive 2009/28/EU

Creation of a guaranteed market for the production and use of liquid biological fuels in Ukraine

Increasing of investments into biofuel sector

Increasing the revenues to budgets of all levels, creation additional workplaces

Improvement of the ecological situation by reducing the amount of emissions into the atmosphere of harmful substances formed during combustion of fuel

State Agency on Energy Efficiency and Energy Saving of Ukraine 6

Thank you for attention!
