

- Commitment to discuss early implementation of Regulation (EC) 984/2013 in line with CESEC obligations
- But: a sound legal basis is needed
  - Regulation (EC) 984/2013 shall become binding in the CPs as soon as possible
  - Reciprocity for MS | CP IPs is needed
- Coordinated and harmonised rules for allocation and use of gas transmission capacities is key but lacking
  - Stronger coordination between NRAs and TSOs needed to achieve harmonisation across borders and mitigate investment risks
- Improved access to gas capacities in the EnC needed
