Welcome to Monthly Methane Mondays in 2022
WEBEX RULES

1) During the webinar, please keep your **microphone muted** and preferably **camera turned off**

2) Please **write your questions** using the **chat function** during the presentations, we will come back to them in the Q&A section

3) During the **Q&A session**, please use “**raise hand**” function (next to your name in the list of participants on the right hand side) and wait until invited to speak

4) When taking the floor, please don’t forget to **unmute microphone and turn on camera**
Methane Mondays’ focus

Gas and oil industry

- Measurement, monitoring and reporting
- Leak Detection and Repair
- Emissions' reduction
- Verification of reporting
- Limits to venting and flaring, flaring standards
- Methane emissions occurring outside of the EU / import transparency

EU regulation on methane emissions reduction in the energy sector
Mr Georges Tijbosch, MiQ, CEO

- MiQ’s gas certification system, which allows natural gas to be credibly certified based on its methane emissions performance
- The benefits of MiQ certification for gas operators and buyers
- How the MiQ Standard is designed to complement government regulation, such as the EU Methane Strategy, and international climate commitments, like Global Methane Pledge
- Q & A
7 February: MiQ Certification of methane emissions

14 March: Industry views on the EC proposal for a regulation on methane emissions reduction in the energy sector

11 April: Global (data) overview: IEA Methane tracker, OGCI initiatives, CAF view, GERG

16 May: OGMP framework: reporting and implementation plans, technologies to come from Tier 1 to Tier 5

20 June: MARCOGAZ BATs to reduce methane emissions
