ENTSOG 12th Transparency Workshop
appygas – the gas market made easy

Caroline Aumeran – Head of Product
Vienna 28.11.2018
Wouldn’t you say that working in the gas industry sometimes feels like you’re banging against the wall?
We have good news for office walls and heads!

Nov 2016 → Sept 2017 → Feb 2018 → Nov 2018

The idea was born
Test of prototype on the market
Start of IT development
Product Launch at E-World

200 companies registered and customers in London, Paris, Geneva, Germany...

A 4-month high-speed development and launch only made possible thanks to ENTSOG’s public and reliable data
1. Appygas in a nutshell
Our solution to make the gas market easy to understand

- **FLOWS MAP**: Grasp and analyse near-realtime data quickly and work more effectively and efficiently.
- **ROUTE CALCULATOR**: Identify trading opportunities easily and react to the spreads more swiftly and efficiently.
- **AVAILABILITY**: Anticipate the maintenance and take it into account when making trade decisions.
- **TRADES**: Boost your trades on the secondary market by getting in touch easily with other gas market players.

Deliver pertinent analysis to the team

Share pertinent analysis with the team

improve your booking strategy taking into account all parameters (exact fee, prisma auctions analysis, maintenance monitoring...)

better history analysis and forecast through accurate, reliable, aggregated and physical data, anytime
2. Deep-dive into our modules
Flows Map: get the big picture

9 market areas covered: now with Gaspool, AVTP and PSV

near real-time data for VIP, storages, production points and LNG terminals, from the market area to the physical level

widgets with spot prices, pipeline and LNG supply in Europe
Route Calculator: improve your booking strategy

- get all alternative routes from A to B
- filter the results with your own criteria
- compare spread and transport
- display last PRISMA auction results
- never miss an auction again
Availability: upcoming maintenance, any time

- Monitor the upcoming works on your portfolio
- Check the usage of your network points with the Flows Map to anticipate congestion
Trades: boost the secondary market

- create an offer to sell or buy transport capacities
- publish your offer
- stay anonymous or not
- get in touch with other gas market players
- close the deal on PRISMA
Our solution is based on reliable data

- our data are:
  - accurate
  - harmonized
  - reliable
  - near real-time
  - transparent
  - at your fingertips

- 100,000 data crawled per day
- more than 40 sources
- up to 4 sources per variable
- priorities of sources according to the best quality
Usage of ENTSOG TP API as a data source

- Fundamental source for our Flows Map and Maintenance modules
- 120 queries per run
- New run every 3 hours, soon hourly
- 12,000 raw data called per run
- Primary source for 2 out of 9 market areas (TTF and GPL) and partially for the maintenance module
- Second or third source for all data of these modules
3. Stay tuned... more coming soon!
Strengthen the base; enhance data quality and processing.

Extend the scope: geographical (Eastern Europe) and data coverage for storages & LNG.

Scale up business model with and for customers.

...to be continued in 2019.
