Guidance on mitigation

Monika Figaj
Ministry of the Environment
Warsaw, 12.09.2019
What is an NDC?

„in order to achieve the long-term temperature goal (…), Parties aim to reach global peaking of greenhouse gas emissions as soon as possible, and to undertake rapid reductions thereafter (…..) so as to achieve a balance between anthropogenic emissions by sources and removals by sinks of greenhouse gases in the second half of this century (…)"

Each Party shall prepare, communicate and maintain successive **nationally determined contributions** that it intends to achieve. Parties shall pursue domestic mitigation measures, with the aim of achieving the objectives of such contributions”
your set of post 2020 country actions (NDC) + the set of actions of others (NDCs) =
The EU submitted its INDC in 2015. After the ratification of the PA it became its NDC.
Reduction of at least 40% by 2030

CO₂  CH₄  N₂O  HFCs  PFCs  SF₆  NF₃

domestic reduction
„Each Party's successive nationally determined contribution will represent a **progression** beyond the Party's then current nationally determined contribution and **reflect its highest possible ambition**”
What does an NDC look like?

When communicating their NDC’s „all Parties shall provide the information necessary for clarity, transparency and understanding” – ICTU?
ICTU: information accompanying NDCs which describes how they were created and what they “mean”.

In accordance with art.28 of Dec. 1/CP.21, we should provide guidance for the information on NDCs to facilitate CTU.
ICTU guidance

Communication of NDCs may include, as appropriate,: 
• quantifiable information on the reference point (ex. a base year),
• time frames and/or periods for implementation,
• scope and coverage,
• planning processes,
• assumptions and methodological approaches, including those for estimating and accounting for anthropogenic greenhouse gas emissions and, as appropriate, removals,
• how the Party considers that its NDC is fair and ambitious
• how it contributes towards achieving the objective of the Convention as set out in its Article 2;
Why such ICTU guidance?

NDC types:

- Reduction targets relative to BAU
- Absolute emission targets
- Policies and actions
- Intensity targets
- Peak target
- Other
Why do we need ICTU?

- To better understand individual contributions…
- To better understand where we stand together, with our collective contribution…

...towards our long-term temperature goal

To understand and overview our efforts towards what we have set out to achieve individually and collectively
ICTU guidance application

„strongly encouraged“ applicable

Accounting of NDCs

ex. reduce emissions by 13% compared to BAU scenario

Accounting = a tool of measuring progress towards set, political goals (NDCs).

It does not reflect what the atmosphere sees.
Accounting in PA

Parties shall account for their NDCs. In accounting for anthropogenic emissions and removals corresponding to their NDCs, Parties shall promote environmental integrity, transparency, accuracy, completeness, comparability and consistency, and ensure the avoidance of double counting, in accordance with guidance adopted by the COP.

In the context of their NDC, when recognizing and implementing mitigation actions with respect to anthropogenic emissions and removals, Parties should take into account, as appropriate, existing methods and guidance under the Convention.
Guidance for accounting

(a) Parties account for anthropogenic emissions and removals in accordance with methodologies and common metrics assessed by the Intergovernmental Panel on Climate Change and adopted by the COP;

(b) Parties ensure methodological consistency, including on baselines, between the communication and implementation of NDCs;

(c) Parties strive to include all categories of anthropogenic emissions or removals in their NDCs and, once a source, sink or activity is included, continue to include it;

(d) Parties shall provide an explanation of why any categories of anthropogenic emissions or removals are excluded;
Accounting guidance application

„may apply”
Provides a set of rules to make NDCs more understandable, transparent, comparable in order for us to understand where we are compared to where we want to get.
Dziękuję!
