DEEP-GREENING: MAINSTREAMING SUSTAINABILITY ACROSS A FINANCIAL INSTITUTION

Integrate green lending practices into its core business approach to the benefit of the institution and its clients

What does it take to become a Green Financial Institution?

- Build sustainability into the institution’s business purpose and mission.
- Institutionalize green lending and build dedicated teams with supporting structures and committees.
- Develop and mainstream a green lending approach and build solid business around these.
- Integrate sustainability metrics into risk assessments & credit analysis and implement environmental & social safeguards.
- Communicate sustainability values to internal and external stakeholders, actively outreach to existing and new clients.

Institutions may choose to tackle different elements of a green finance strategy at different times.
