Expert Area 5: Data gathering on buildings renovation investment programmes

11th March 2020
EnC Secretariat plans to publish the 1st Western Balkans Energy Transition Report with the long-term objective to support and facilitate energy transition;

Focus of the first report: findings on the implementation of a short-term objectives (by 2020) in energy efficiency, renewable energy, climate and environment, electricity market;

Assessment of the current situation: using a combination of quantitative/qualitative assessment;

Further plan is to use the information gathered on EE in buildings to use in proposing new legislation, NECP preparation and other support measures.
BUILDING RENOVATION IN NATIONAL EE ACTION PLANS

- Most CPs have submitted their last NEEAPs (at least draft versions);
- All CPs have some EE measures for the building sector (focusing on public sector);
- However some reports are lacking detailed quantitative reports on the EE measures in buildings;
- Some already started to draft new NEEAP measures in buildings → however they should be included in NECPs as of 2021.

Color code:
- Red: submitted / detailed measures
- Yellow: Draft / some measures
- Green: Not submitted / no measures
- Blue: No data
Several international donor open databases have been used for data gathering:
- KfW, WB, EBRD, USAID, EU, GGF, etc.

Following main categories were assessed:
- Amount and type of finance;
- Type of intervention;
- Level of intervention:
- Type and number of buildings affected;
- Energy efficiency and emissions reduction gains.

Large number of programmes were found, however available data varies significantly.
BUILDINGS RENOVATION
INVESTMENT PROGRAMMES – GAPS

Mostly missing information are:

- Planned or actual end of the programmes;
- Number of buildings affected;
- Planned or actual energy savings;
- Planned or actual emissions reduction.

More information could be gathered:

- Type of intervention.
**Questionnaire sent to contact points and IFIs on 18th February 2020;**

**Deadline for response is 30th March 2020;**

**Data gathering and evaluation by the Secretariat by mid April;**

**Presentation of a Sustainability Report during the EU-Western Balkans Summit in May 2020;**

**Data gathering starts for next Sustainability Report to be produced on a regular basis.**

In the long run data will be used as a basis for legal and technical proposals, such as EcoDesign, NECP, new EPBD etc.
