Find out about EU Member States' experience in reporting progress under Implementing Regulation (EU) 2022/2299

In 2025, Energy Community Contracting Parties started to report for the first time on the status of implementation of their integrated National Energy and Climate Plans by means of an integrated national energy and climate progress report. The respective reporting obligation is detailed out under Article 17 of Regulation (EU) 2018/1999 and in the 23 Annexes of Implementing Regulation (EU) 2022/2299.

EU Member State practitioners already gained experience with reporting under this obligation during two reporting cycles. In this webinar series, they will share their experiences - showcasing the institutional set up for reporting in their jurisdiction and the various sources of data they activated to complete reporting under each of the 23 Annexes.
