UA UGSs AS A KEY FACTOR OF GAS SUPPLY SECURITY

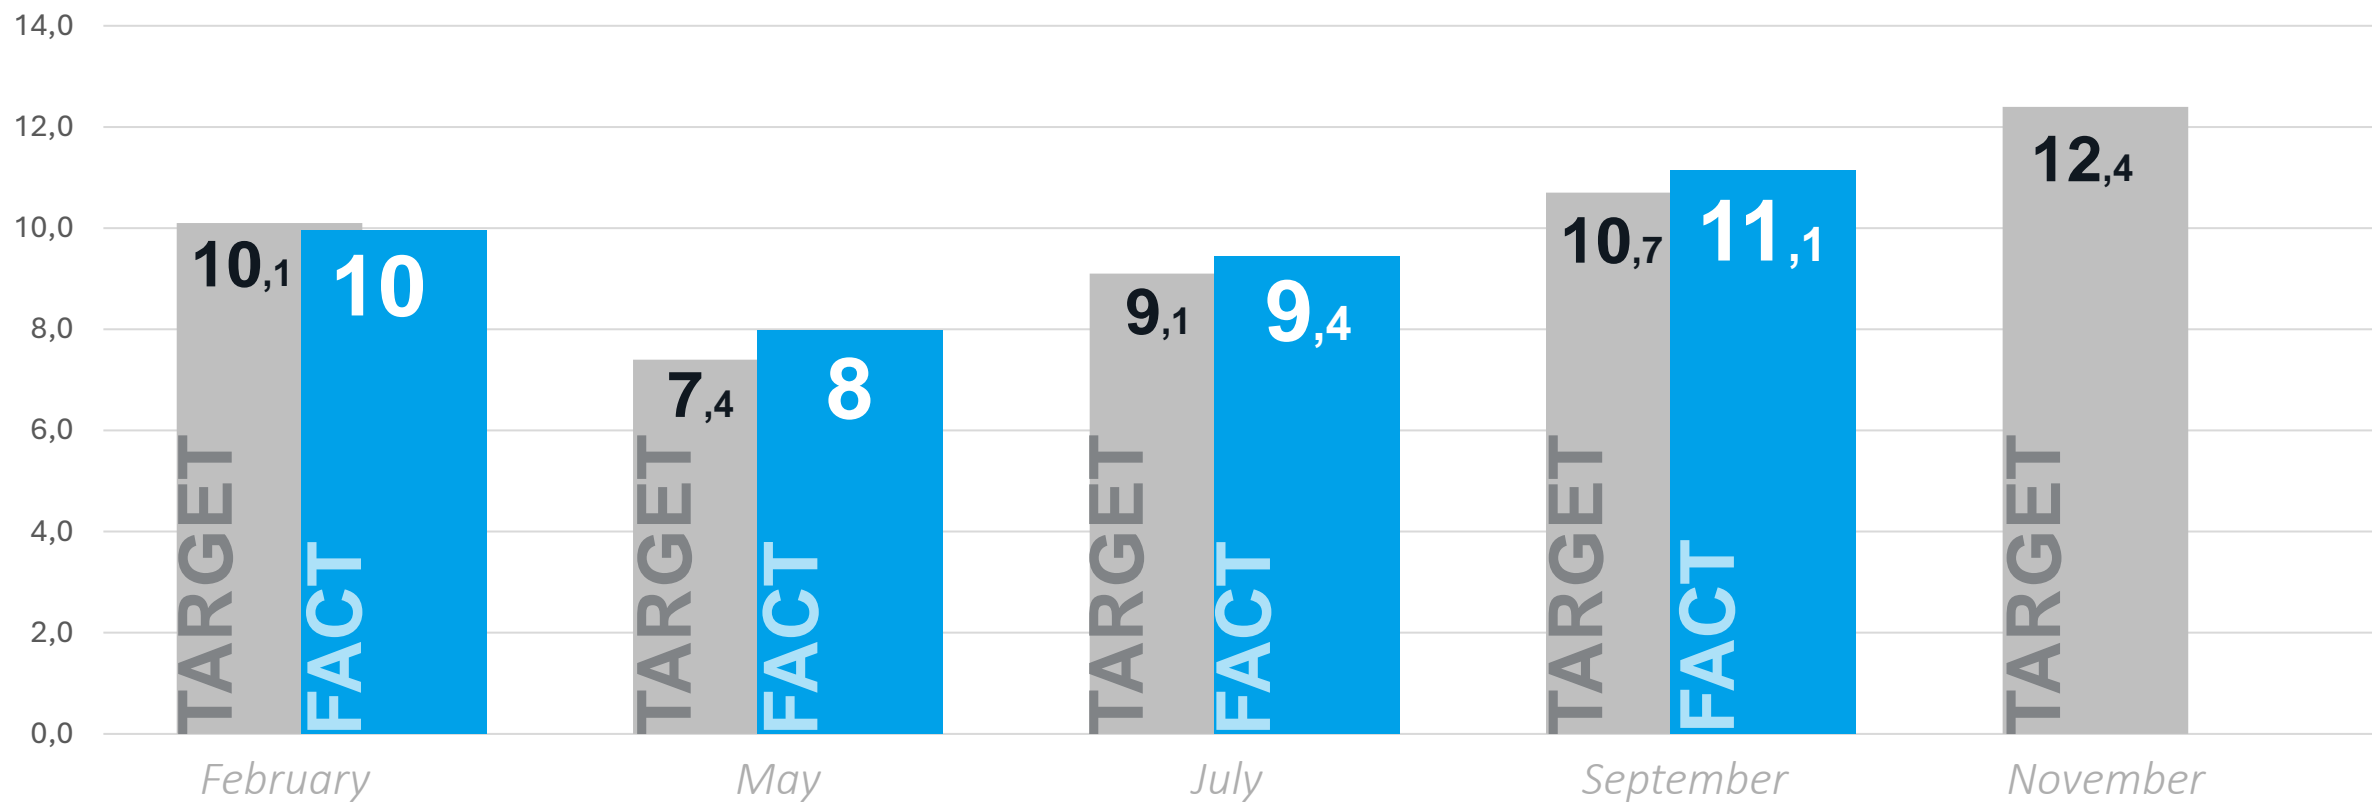

RETROSPECTIVE OVERVIEW

FILLING TRAJECTORY OF UA STORAGES

WITH INTERMEDIATE TARGETS

FOR 2024*

The Energy Community, taking into account technical information and significant reduction in consumption due to the war, set the levels of filling the UGSs for Ukraine in accordance with a proposition of the Working Group in Ukraine on consumption statistics for the last three years (2021-2023)

STATUS AS OF NOW:

UTG is entirely in operation

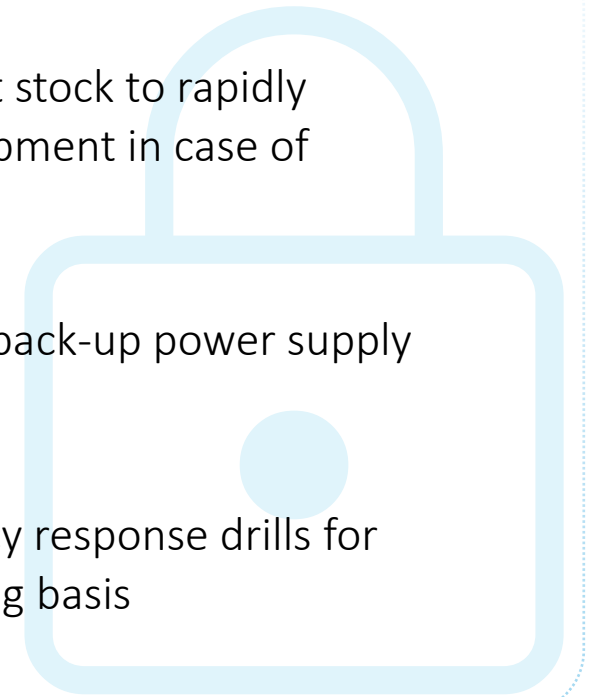

NOMINATIONS / RE-NOMINATIONS:

100% confirmed

- › **Strengthening** critical infrastructure safety, security & defense
- › **Protecting** critical infrastructure with special constructions
- › **Repairs and renovations** by our service branches (Ukrgezprombud, Ukgazenergосervice, TECHDIAGAZ)

- › **Extending** equipment stock to rapidly replace damaged equipment in case of emergencies
- › **Ensuring** emergency back-up power supply at each UGS facility
- › **Organizing** emergency response drills for UTG staff on an ongoing basis

Ukrgazprombud

Construction, reconstruction and repair of facilities for the gas industry

27.8 mln eur

1 513

Gas Transport Institute

Gas infrastructure design services (design, standardization, etc.), technical decision making

1.5 mln eur

78

Ukrgazenergoservice

Maintenance of gas pumping, power and other equipment, systems of compressor stations

9.3 mln eur

555

TECHDIAGAZ

Assessment of technical equipment condition, diagnostics, etc.

3.5 mln eur

208

42.1 mln

2 354 personnel
