The ECRB therefore suggested to regulators considering the application of certain regulatory investment incentives (for details see the recommendation paper) already before the adoption of Regulation (EU) No 347/2013. To the extent regulators should not yet be equipped with related powers, the ECRB recommends to the Ministerial Council to urge for legislative adjustments. - ECRB to discuss a toolbox for regulatory investment incentives and criteria for assessing projects' eligibility as part of its Work Program 2014.
